Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2655

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4-6, 8-15, 17-19 and 21-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Sansone et al. (6,370,238).

As to claim 1, Sansone teaches a prompting system for efficiently accessing a specified function desired by the user, comprising:

Outputting a prompt to a user;

Receiving a response by the user;

Processing the response for determining set of data (function), where the set of data are (bookmarks) "coordinates or folder labels" indicative of the desired position or function in the dialogue (Fig.3; Col.7, lines 6-23; Col.20-26).

As to claims 2 and 4-6 and 8-11, Sansone teaches automatically determining "keyword" in the user response for identifying a specified function, including a storage means for storing coordinates or words that will be used to determine the specified function/position in the dialogue (Col.7, lines 36-57).

As to claims 12-13, Sansone teaches where the IVR prompting system selects prompts and branches from function to another based on the response of the user (Fig.3).

Claims 14, 15, 17-19 and 21-28 are analogous to the claims above and are rejected by Sansone for the foregoing reasons.

Allowable Subject Matter

Claims 29-72 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the above claims are allowable because Sansone or the prior arts of record do not teach the question selecting means as recited in the claims.

Claims objected

Claims 3, 7, 16 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Himmel et al. (6,314,423).
